# DEFENCE SOLUTIONS

RAS/FAS/VERTRAP SYSTEMS | ENGINEERED PARTS | SPARE PARTS

## THE TAILORED SUPPORT DEFENSE ORGANIZATIONS NEED

Knowing the pressures under which military engineers and procurement professionals work, we provide responsive, flexible support to keep your plants up and running and your projects on track.

We support navies, armies and defense companies in mastering technical challenges in the areas of lifting, towing, rigging and supply at sea.

From the delivery of compliant parts based on your NATO order number to the development and installation of multi-ship RAS systems, we are pleased that our customers rely on our quality, competence and sound technical advice.

We manufacture bespoke equipment and build-to-print parts to deliver secure systems that meet all relevant standards. We understand the complexity of defense work and are eager to take on the challenges it brings.

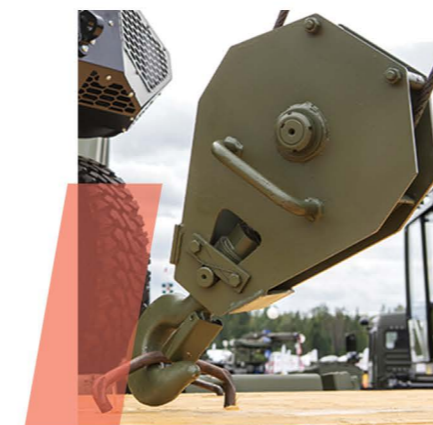

## BESPOKE MILITARY PARTS

We are known for our ability to create new or replacement parts exactly according to your requirements and drawings.

### OUR FOCUS HERE IS ON

- ✔ Bespoke rope blocks & shackles
- ✔ Towing equipment according to VG
- ✔ Equipment for refueling & refueling at sea
- ✔ Components according to DIN/VG

### BUILD-TO-PRINT

In order to be able to meet your requirements, we use a large number of materials in our production, both magnetic and non-magnetic. So you can be sure that every part meets the required specifications.

### CUSTOMIZED MANUFACTURING & PRODUCT DEVELOPMENT

You don't have a drawing for your component? No problem. We are happy to take on this technical challenge and develop the right component together with you – from prototypes to series production. As an experienced specialist, we value the

## NATO STOCK NUMBERS

If you're a defense procurement professional, our team will work alongside you to translate NATO stock numbers (NSN) into a meaningful commercial bid.

Our experience working with naval and army contractors worldwide – and our access to defense standards – means we're able to interpret NSN codes and high-level descriptions into clear, compliant technical specifications.

And in cases where a commercial alternative is acceptable, we can provide COTS options that match the specified part in fit, form and function.

## RAS/FAS SYSTEMS

We deliver the complete transfer device for supply at sea (RAS & FAS) according to relevant NATO standards.

### OUR FOCUS HERE IS ON

- ✔ Fueling Connections
- ✔ Rigging
- ✔ Hoses
- ✔ Winches
- ✔ Masts
